The Face of Fine Homes since 1946

Infinity Classic™

Adds Beauty to Any Home, for
Virtually the Life of the Home

Infinity Classic Model IA02S

Infinity Classic is lightweight and strong, thanks to the patented aluminum paneling that is **50 times stronger than standard aluminum paneling**. Its weather and corrosion resistance is unsurpassed.

Infinity Classic Model IV04S

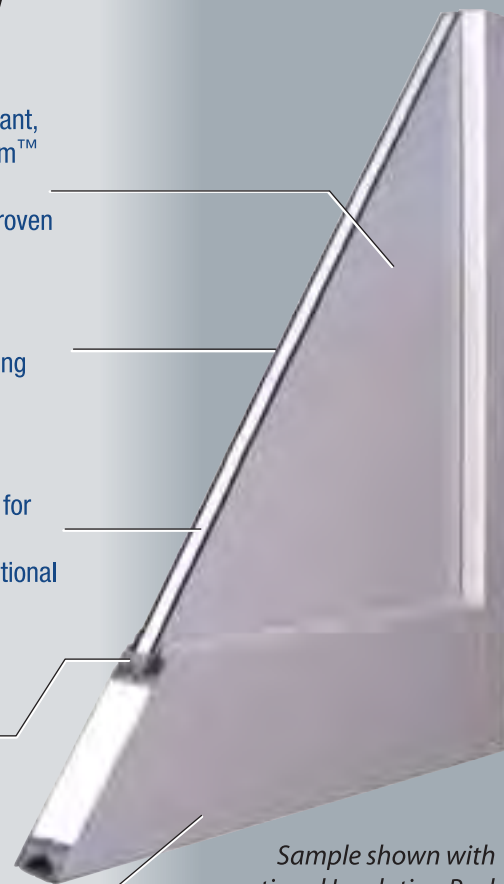

Infinity Classic Model I106S

Key Elements of Infinity Classic Technology

- Standard finish is weather resistant, Polycron III polyester paint system™ fully meets rigid AAMA 2603 performance specifications™ - proven tough in all conditions.
- Corrosion-proof all-aluminum construction resists dents, warping and delamination.
- Patented aluminum panels have thermal plastic honeycomb core for superior strength, rigidity and additional thermal protection (optional insulation package shown).
- Commercial grade extruded aluminum stiles and rails are mechanically fastened for superior strength
- Unique section design closely resembles traditional carriage house door style.

Sample shown with
optional Insulation Package

Infinity Classic comes standard with white Polyester Finish that is maintenance free and is as rugged as the door's construction. Custom colors and coatings are also available or the doors can be field painted to match your custom home colors. Window mullions allow for various design combinations and simulate individually divided windows.

ENVIRONMENTAL ADVANTAGES:

The Infinity Classic uses approximately 25% recycled aluminum in the aluminum frame, the maximum allowable to maintain both strength and quality assurance. All Infinity Classics are manufactured in a "zero waste to landfill process". For thermal advantages the door frame as well as the glass and aluminum panels can be insulated. Low-E glass is also available for additional thermal advantages.

Dozens of Carriage House Designs

Infinity Classic Model I203S
(Shown with optional decorative hinges and handles)

Infinity window grids and door designs offer incredible definition with sharp, crisp lines that make this beautiful aluminum garage door look like the millwork of old. The stile and rail profile is nearly an exact replica of the original wooden stile and rail carriage style garage door.

Windows are available in 1, 2, 3, 4, 6, 8 and our most distinctive 9-lite configuration. 1-lite through 8-lite configurations are also available in both standard and custom arches.

The standard arch radius for up to 10' wide door windows is 15'-0" radius and over 10' wide is standard 58'-0" radius. If your garage door opening has an arch we can build a custom window arch to exactly match it.

In addition to the standard designs shown, optional custom designs can also be created; the section and panel can be customized to meet your specific requirements.

Infinity Classic has a maximum section height of 32" which offers excellent aesthetic appeal while maintaining smooth door operation because of all-aluminum construction.

Infinity Classic doors are available in any width and height up to 20'x14'. Decorative hardware as well as obscure, tinted and insulated glass are also available options.

Optional Decorative Hardware

Classic Series Deco Kit A

Rustic Iron,
Black Powder
Coated Finish

Traditional Series Deco Kit B

ALL-ALUMINUM
Infinity Classic™ / The Best of Both Worlds

There was a time when real horse-drawn carriages rested behind hand-crafted wood doors that swung out when it was time to travel. Today, the romance and elegance of carriage house doors have drawn the owners of fine homes to seek ways to capture that elegant appearance – while enjoying the convenience and protection of contemporary garage doors.

That combination is now available in the high performance, corrosion resistant, all-aluminum Infinity Classic, and you can offer your customers Everlasting Elegance for their garage and home. Contact us for complete information.
